

M.S. (Martijn) Thijssen
Senior Advisor

Curriculum Vitae

Profile

I am an experienced programme manager who is passionate about booking results through intensive teamwork. I see the involvement of organisations that have strong interests in certain societal challenges as a prerequisite for good policymaking. Through this involvement I make sure we identify collective solutions and measures that will last, with full respect for the different responsibilities and interests of the involved organizations. I have 25 years of experience on environmental and sustainability policies, both on international, national and regional scale. Examples include the implementation of the European Water Framework Directive, the policies on local use of contaminated soil, and the Dutch sustainability policies. I am currently working on the topic of natural capital, advising at national and international level. I'm secretary of the global network 'Promote Pollinators' and involved in the CBD and IPBES community. Other recent topics are the evaluation of the Dutch policies on the implementation of integrated pest management, a midterm evaluation of the implementation of the Dutch Soil Covenant, and the relation between climate change and the health of our nature.

Experience

ORG-ID BV

2014-present *associated partner/Senior adviser*

Currently working on:

- Promote Pollinators. Running the secretariat of a coalition of currently 24 countries that want to work on the protection of pollinators. Organizing strategical discussions, meetings & workshops, communication, website etc.
- The implementation of best available techniques for applying pesticides in agriculture;

Date of birth

08-03-1961

Function

Associated partner/senior-advisor

Expertise

Process and programme management, strategic advise, policy advise
